ORE SERIES

Electric Instant Water Heater

A TOUCH OF BRILLIANCE

Rinnai Ore Series Shower Heater, the first illuminating shower heater engineered with 'ore-like' precision, where raw stones are transformed to reveal its true worth, both sleek in design and priceless in look.

The Rinnai Story

Since 1920, Rinnai has been in the business of household gas water heating and floor heating, as well as kitchen and commercial cooking appliances that have been helping people achieve cost efficiency and convenience in their day-to-day lives.

Every product developed by Rinnai is introduced with innovative qualities. Not only are they designed to simplify daily tasks, they also address environmental concerns.

Today, Rinnai is taking its first leap into the electric water heating domain, with the birth of the Ore Series electric instant water heater.

The Ore Series

The name of this product range stems from the word Ore, which is the precious mineral harvested for its invaluable worth. While ordinary in its raw form, the right use will harness its true, priceless appearance.

1st Illuminated Water Heater in Malaysia

Rinnai is always looking out for you to fulfill all your household needs, in the kitchen and, now, even in your bathroom. The Ore Series water heater is not only truly functional, the beautiful glowing indicators and logo make it easy to understand while further enhancing its elegant design.

Simple and Elegant

This minimalist design water heater is extremely easy to operate, with only 1 knob to power up the stepless temperature control throughout its entire use. It is encased in a stunningly-designed sleek chassis and decked up in the refined, timeless colours of Metallic Silver or Piano Black, with a super high-gloss finishing.

A background image showing a spray of water droplets falling from the top, creating a sense of freshness and movement. The droplets are in various stages of falling, with some appearing as sharp streaks and others as more rounded drops.

DC Silent Pump

- Advanced brushless DC motor technology
 - Silent operation
- Save up to 50% energy compared to AC pump
 - Maintenance-free, no carbon brush
- Pump speed control, suitable for high and low water pressure
 - Cost effective and ecological
 - Longer life-span
 - 5 years warranty

Safety Features

Residual Current Device (RCD)

- Cuts off electricity supply in event of current leakage

Lightning & Surge Protection

- Built-in surge protector
- Protects from lightning strikes and current leakage

Dual Over Temperature Safety Cut-Off

- Auto reset if water temperature exceeds set limit
- Avoids overheating and scalding

Primary cut off 55°C
Secondary cut off 85°C

IP25 Splash-Proof Protection

- ABS plastic waterproof casing
- IP25 Safety Standard compliant
- Prevents water and dust

Auto Flow Sensor Switch

- Shuts off heater if water flow is too low
- Avoids dry burn
